

Dr.Marghny Hassan Mohamed

Professional Resume

Personal Details:

Name: Marghny Hassan Mohamed

Address: Dept. of Computer Science, Faculty of Computers
and Information Science, Assiut University, Assiut, Egypt.

Tel: 20-088-291760

Mobil: 20127432282, 0172000034.

Email: marghny@aun.edu.eg.

Education:

July 2013, prof., at the dept. of Computer Science, Faculty of computer and information sciences, Assiut Univ.

July 2007, associate prof., at the dept. of Computer Science, Faculty of computer and information sciences, Assiut Univ.

April 2002: Ph.D. in Computer Science from Kyushu University, Japan.

July. 1993: M.Sc. in Computer Science, Assiut University, Egypt.

Jun. 1988: B.Sc. in Mathematics, Assiut University, Egypt.

Managerial positions

- 1- Supervision of the dept. of information system from 26-5-2008 until 28-9-2009
- 2- Manager of Consultation of Computer Center from 14-10-2008 until now
- 3- Based work and Vice Dean for Community Service and Environmental Development from 29-9-2009
- 4- Vice Dean for Education and Student Affairs from 3-1-2012 until now.

Work Experience:

Oct. 1990 - July. 1993: Demonstrator

Aug. 1993 - Oct. 1996: Assistant Lecturer

April 2002- July 2007: Lecturer at Assiut University, Faculty of Computer and Information Science.

July 2007 – June 2013 Associate prof., at the dept. of Computer Science, Faculty of computer and information sciences, Assiut Univ.

July 2013 up till now prof., at the dept. of Computer Science, Faculty of computer and information sciences, Assiut Univ.

These Jobs involves teaching a wide range of computer Science and Information System courses in the Faculty of computer and information sciences and Faculty of Sciences Each course covers basic material as well as supplemental material.

Teaching courses:

Undergraduate

1. Formal Language and Automata theory (Third Year)
2. Logic Programming (Third Year)
3. Artificial Intelligence (FCI (Third Year) , FS (fourth year))
4. Computer System (FS (Third Year CS)),
5. Data Structure (Second Year)
6. Introduction to Computers (First Year)
7. Decision Support System (Elsadat Academic)
8. Information Systems (Second Year Is)
9. Management Information System (Fourth Years Is)
10. Object Oriented programming (Fourth Year Cs)
11. Office Automation System (Fourth Years Is)
12. Information Systems (Second Year Is)
13. Pattern Recognition (Fourth Year CS)
14. Data Mining and Warehousing (Fourth Year IS)
15. Computation Theory (fourth Year CS)

Graduate :

1. Advanced Data Mining and Warehousing
2. Advanced Artificial Intelligence.
3. Information Retrieval, Filtering and Classification
4. Machine Learning
5. Neural Networks
6. Intelligent Computation
7. Pattern Recognition
8. Information System Design

Research Interests

- **Data Mining**

Data mining is the process of extracting knowledge for decision from huge amount of data.

- **Text Mining**

Text mining is the process of extracting implicit knowledge necessary directly for decision from textual data. Instances of text mining are text categorization, text clustering, text summarization, text segmentation, text association, and so on.

- **Information Retrieval**

Information retrieval is the process of mapping full texts into lists of words. Researches on such process are necessary as a fundamental research for implementing information retrieval systems and techniques of text mining.

- **Web Mining**

Web mining is the process of extracting implicit knowledge from structure, content, and user profile of web documents. Web mining is regarded as the extension of text mining to web documents.

- **Machine Learning**

Machine learning is the computation approaches classifying or clustering unseen examples by analyzing sample data and defining computation models.

- **Pattern Recognition**

Pattern recognition is the process of classifying or clustering patterns represented into feature vectors, syntactic structure, and objects.

- **Neural Networks**

An Artificial Neural Network (ANN) is an information processing paradigm that is inspired by the way biological nervous systems, such as the brain, process information. Evolutionary Computation, It is an optimization techniques simulating the evolution of entities in biology.

- **Security**

My research focuses on information security. Current research topics are the security using golden matrix, I am also interested in steganography and have done research on cryptographic protocols at large.

Spoken Languages: - Arabic, English, Japanese.

Projects

Advanced Research Projects

Manger of "*Diagnostics System for Endemic Diseases in Egypt Using Self Organizing Data Mining*", this project supported by Information Technology Academia Collaboration (ITAC), Egypt.

Final Year Projects :

Supervision of many final year project in computer science, information system and information technology.

Supervisor

Supervision of more than 50 master and Ph. D. Thesis
