

Dr. Omnia HB El-Badawy

Title:

- Assistant professor of Medical Microbiology & Immunology

Affiliations:

1. Medical Microbiology & Immunology Department, Faculty of Medicine, Assiut University
2. Molecular Biology Department, Molecular Biology Research & Studies Institute, Assiut University

Research interest

- Application of immunodiagnostics for evaluation of the contribution of the cellular and humoral immune responses in the immunopathogenesis of cancers and chronic infections
- Exploring novel approaches in diagnosing and treating immunological disorders
- Application of molecular diagnostic techniques for studying the microbial control of effector and regulatory functions of immune cells.
- Application of immunotechniques for assessment of immune cells as potential biomarkers of clinical outcomes in cancers and chronic infections
- Application of immunotechniques to explore the potential use of immune cells as novel immunotherapies in cancers and chronic infections
