

This diploma provides a clear and accurate understanding of the science of microbiology and immunology as it discusses the microstructure of microorganisms, methods of their classification, infectious diseases caused by these microbes, and immunology. Special emphasis is placed on clinical concepts in infections and antibiotic resistance. It qualifies pharmacists to work in the field of infection control and in the field of medical and clinical research.

Semester	Code	Course Title	Credit Hours			Grades			
			Lecture	Practical	Exam Time	Written	Practical	Oral	Total
First	DPM-201	General Bacteriology	2	1	2	60	20	20	100
	DPM-202	General Virology and Mycology	2	1	2	60	20	20	100
	DPM-203	Immunology	2	1	2	60	20	20	100
Second	DPM-204	Advanced Bacteriology	2	1	2	60	20	20	100
	DPM-205	Advanced Virology and Mycology	2	1	2	60	20	20	100
	DPM-206	Pharmaceutical Microbiology	2	1	2	60	20	20	100
