# Klodorone A and Klodorol A: New Triterpenes from *Kleinia odora*

Nawal M. Al Musayeib, Ramzi A. Mothana, Sabrin R.M. Ibrahim, Ali A. El Gamal, Shaza M. Al-Massarani

## Abstract:

Re-investigation of the EtOH extract of the aerial parts of *Kleinia odora* led to the isolation of two new triterpenes; klodorone A (3) and klodorol A (4), together with two known compounds:  $\beta$ -amyrin (1) and germanicol (2), which were reported from this plant for the first time. Their structures were determined by using extensive 1D ( $^1\text{H}$ ,  $^{13}\text{C}$  and DEPT) and 2D ( $^1\text{H}$ - $^1\text{H}$  COSY, HMQC and HMBC) NMR and mass spectral measurements in addition to comparison of their data with the literature.
