

Anatomical Studies on the N. Maxillaris of the One Humped Camel (*Camelus dromedarius*) With Special Reference to its Blockade

M. El-Shaieb, A. Hifny and N.A. Misk

Abstract:

The origin, course and distribution of the maxillary nerve and its branches in the one humped camel (*Camelus dromedarius*) have been described in detail and compared with other animals. The blockade of this nerve and its branches was also studied.
