# Splenectomy in Sheep (I. Technique and Haematological Changes)

H. Ibrahim, N.A. Misk, A.A. Amer and Fatma El-Tayeb

## Abstract:

Splenectomy was performed on eight rams to study the effect of this operation on the haematological picture of such animals. Samples were taken before and at 1,2,3,4,5,6,7,8, 15&75 weeks post operation. Red and white cells picture was influenced by this operation
