A new larval Lassenia Newell, 1957 (Trombidiformes: Tanaupodidae) from Japan

Haitlinger, R.; M. W. Negm; T. Gotoh; M. Šundić

Abstract:

Lassenia japonica Haitlinger, Negm & Šundić sp. nov. with fnCx 1-1-2 is described and illustrated from larvae collected from Maesa japonica (Primulaceae) in Japan. It is the first species of Tanaupodidae found in Japan. A key to Lassenia (larvae) of the world is provided.

Keywords:

Lassenia japonica, larva, Parasitengona, new species, key
