Eutetranychus palmatus Attiah, 1967 (Acari: Tetranychidae), a newly recorded spider mite pest of date palm from Syria

Zeity, M. & M.W. Negm

Abstract:

Specimens of Eutetranychus palmatus were collected from leaves of date palm, Phoenix dactylifera L. and Phoenix roebelini (Arecaceae) in Latakia city, Syria. This is the first record of E. palmatus from Syria. Taxonomic remarks of males and females are provided.
