# A Supplementary Program for Sports Education Curricula in Schools (Primary Education)

Adel Hosny Elsayed Shawaf

## Abstract:

It is that program organized by the educational unit to be integrated with the education programs in order to achieve specific educational goals either related to teaching school curricula or to acquiring experience or skills inside or outside the educational unit. This should lead to developing students' experience and enhancing their habits, capacities, and orientations which is an educational activity providing an integrated and balanced education from the emotional, social, physical, and mental aspects. This will be done through various sports fields and activities supervised by professional leadership that works to achieve the objectives of the sport activity which in turn will achieve the overall objectives of physical education in all stages of public education. The study aims at recognizing the effect of a supplementary program on students of primary school education, aged from 6 to 12 years. The most important result was a positive effect of the supplementary program among the sample that motivates them to practice sports.
