

Endovascular Embolization and Direct Percutaneous Injection in Management of Craniofacial Arteriovenous Malformation

Wageeh A. Ali, Afaf Hassan, Mohammed Abdel Rahman, Hany Seif and Hazem Abo Zaid.

Abstract:

Mixed endovascular and direct-puncture embolization is an effective and safe technique for preoperative devascularization of craniofacial arteriovenous malformation.

Keywords:

FACIAL ARTERIVENOUS MALFORMATION, DIRECT AND ENDOVASCULAR EMBOLIZATION
