

Vaccination Program by Central Administration for Infection Control and Prevention – Assiut University Hospital

Enhancing Participation in the University and Community Plan to Combat Hepatitis Viruses

- Given the national priority to eradicate viral hepatitis, the faculty actively collaborates with numerous organizations, such as the Egyptian Liver Foundation, gastroenterology societies, the Infection Control Unit, the Department of Community Medicine, the nursing staff, blood donation programs, and other relevant institutions. The faculty contributes to developing a comprehensive strategic plan to support the University's Liver and Environment Health Center, aiming to improve public health across the region.

Combating Respiratory, Hepatic, and Blood-Borne Viruses

- The faculty also participates in executing the university's strategic plan for the prevention of respiratory, hepatic, and blood-borne viruses, in cooperation with the University Center for Environmental Studies and Public Health, under the supervision of the University President.
