I-Welcome Statement:

The Department of Dermatology, Venereology and Andrology welcomes you to the Master of Science in Andrology .As a department we are committed to medical student education and continuously strive to improve your educational experience.

This handbook presents information guide and logbook activity of this degree administered by the Dermatology, Venereology and Andrology department, Faculty of Medicine, Asyut University.

II Aim of the activities book

I. Mission Statement

The mission of the program is to train specialists in Andrology who are capable of independent practice. An Andrologist is a specialist trained in the diagnosis and treatment of a broad range of diseases .An Andrologist care for hospitalized and ambulatory patients and may play a major role in teaching or research.

The residency program has been created by the Dermatology, Venereology and Andrology Department with close collaboration with the Department of Continuing Medical Education. Its curriculum provides a rigorous training in the basic sciences and a large emphasis on the understanding of pathology and pathophysiology of diseases.

II. Goals and Objectives

Upon completion of training, a resident in Andrology is expected to be a competent specialist in Andrology, capable of independent practice in the specialty. The goals and objectives may be summarized as follows. The resident must:

- acquire a working knowledge of the theoretical basis of the specialty, including its foundations in the basic medical sciences and research.
- acquire the knowledge, attitudes, and skills common to Andrology practice.
- demonstrate knowledge of the pathophysiology, presentation of historical and clinical features, and appropriate investigation and medical management of acute and chronic Andrological conditions.
- demonstrate the knowledge, skills and attitudes relating to gender, culture and ethnicity pertinent to Andrology.
- contribute to research
- have self-evaluation and learning skills in the areas of problem-solving, evidence based medicine, and critical appraisal at a level to ensure that they remain effective clinicians, teachers and investigators throughout their careers.

III. Educational Objectives:

At the completion of training, the resident will have acquired the following competencies and will function effectively as a:

1. Medical Expert/Clinical Decision-Maker

Specialists possess a defined body of knowledge and procedural skills, which are used to collect and interpret data, make appropriate clinical decisions, and carry out diagnostic and therapeutic procedures within the boundaries of their discipline and expertise. Their care is characterized by up-to-date, ethical, and cost-effective clinical practice and effective

communication in partnership with patients, other health care providers, and the community. *General Requirements*

- Demonstrate diagnostic and therapeutic skills for ethical and effective patient care using the best available medical practices.
- Access and apply relevant information to clinical practice.
- Demonstrate effective consultation services with respect to patient care and education.
- Demonstrate an understanding of medico-legal issues as they apply to Andrology.

Specific Requirements

- Elicit, present, and document a history that is relevant, concise, accurate and appropriate to the patient's problem(s).
- Perform, interpret the findings of, present and document a physical examination that is relevant and appropriate.
- Select medically appropriate investigative tools, interpret the results of common diagnostic tests and demonstrate an understanding of their cost effectiveness, limitations and complications.
- Formulate a comprehensive patient problem list, synthesize an effective diagnostic and therapeutic plan and establish appropriate follow up.
- Demonstrate effective consultation skills in presenting well-documented assessments and recommendations in written and/or verbal form.
- Demonstrate an understanding of basic pharmacology and its application to clinical practice.

2. Communicator

To provide humane, high-quality care, specialists establish effective relationships with patients, other physicians, and other health professionals. Communication skills are essential for the functioning of a specialist, and are necessary for obtaining information from, and conveying information to patients and their families. Furthermore, these abilities are critical in eliciting patients' beliefs, concerns, and expectations about their illnesses, and for assessing key factors impacting on patients' health.

General Requirements

- Establish therapeutic relationships with patients/families.
- Obtain and synthesize relevant history from patients/families/communities.
- Listen effectively.
- Discuss appropriate information with patients/families and the health care team.

Specific Requirements

• Demonstrate skills in:

- providing clear, concise and timely verbal and written communication as applied to consultation notes, sign over of patient care and discharge planning;
- communication with patients and families regarding informed consent, the medical condition, plan of treatment, prognosis, primary and secondary prevention, adverse events, medical uncertainty, medical errors, end of life wishes, autopsy and organ donation; and
- $\circ\,$ communication with other health care professionals regarding all aspects of patient care.

3. Collaborator

Specialists work in partnership with others who are appropriately involved in the care of individuals or specific groups of patients. It is therefore essential for specialists to be able to collaborate effectively with patients and a multidisciplinary team of expert health professionals for provision of optimal patient care, education, and research.

General Requirements

- Consult effectively with other physicians and health care professionals.
- Contribute effectively to other interdisciplinary team activities.

Specific Requirements

• Participate in an inter-physician or an interdisciplinary team meeting, demonstrating the ability to accept, consider and respect the opinions of other team members, while contributing specialty-specific expertise.

4. Manager

Specialists function as managers when they make everyday practice decisions involving resources, co-workers, tasks, policies, and their personal lives. They do this in the settings of individual patient care, practice organizations, and in the broader context of the health care system. Thus, specialists require the abilities to prioritize and effectively execute tasks through teamwork with colleagues, and make systematic decisions when allocating finite health care resources.

5. Health Advocate

Specialists recognize the importance of advocacy activities in responding to the challenges represented by those social, environmental, and biological factors that determine the health of patients and society. They recognize advocacy as an essential and fundamental component of health promotion that occurs at the level of the individual patient, the practice population, and the broader community. Health advocacy is appropriately expressed both by the individual and collective responses of specialist physicians in influencing public health and policy.

6. Scholar

Specialists engage in a lifelong pursuit of mastery of their domain of professional expertise. They recognize the need to be continually learning and model this for others. Through their scholarly activities, they contribute to the appraisal, collection, and understanding of health care knowledge, and facilitate the education of their students, patients, and others.

General Requirements

• Develop, implement and monitor a personal continuing education strategy.

Specific Requirements

- Understand the principles of scientific research and how these principles apply to the development and implementation of a research proposal.
- Understand how to search and critically appraise the medical literature.
- Demonstrate the ability to teach medical students, residents, patients, colleagues and other health care professionals.

7. Professional

Specialists, as professionals, have a unique societal role with a distinct body of knowledge, skills, and attitudes dedicated to improving the health and well being of others. Specialists are committed to the highest standards of excellence in clinical care and ethical conduct, and to continually perfecting mastery of their discipline.

Entry Requirements

Prospective candidates:

• should have successfully completed basic medical training leading to MBBCh from a recognized institution.

In this book you will document all clinical, academic and other experiences and

skills you attained during your training.

You should fill the following sections:-

1- Clinical case log

1- You will first find list with all required cases in the concerned module and the minimum number of cases you must get exposed to and level of participation you should achieve for each type of cases.

2- You should record all clinical cases in the module and each case should be signed by you trainer.

2- Clinical case presentation log

Record the cases related to the module that you have presented in a seminar of the activity.

3- Procedures / operations log

1- You will find a list for required procedure, diagnostic – therapeutic operations and level of desired performance you should achieve at the end of training.

4- Rotation / attendance proof

You should have evidence of achievement the required training hours within each module.

For the whole program fill the following sections

A- Document all academic activities e.g. lecture, journal clubs, workshops, conference, services attended. This documentation should include the level of participation " attendance, preparation, presentation,"

B- Academic achievements

- Research "clinical trial" participation.
- Evidence- based medicine eg. "generation of guidelines" protocols

C- Formative assessment log

This document all types of formative assessment attended e.g.:-

- Mini clinical examination and Quieses.

III- Program aims

1) To enable the candidates to keep with the international standards of patient care by achieving high levels of:

- 🖊 🛛 a- Clinical skills.
- 🔸 🔰 b- Patient care skills.
- c- Simple surgical maneuvers such as; testicular biopsy and Varicocelectomy.

2) To introduce the candidates to the basics of scientific research.

- 3) Enable them to start professional careers as specialists in Egypt.
- 4) Make them recognized as specialists abroad.
- 5) Enable them to pursue higher studies and degrees.

6) Enable them to understand and to get the best of published scientific research and to do their own research.

IV- Curriculum Structure

Program Time Table

Duration of program 3 years maximally 5 years divided into

o Part 1

Program-related Basic science courses and ILOs

Students are allowed to set the exams of these courses after 12 months from applying to the M Sc degree.

• Thesis For the MSc thesis;

MSc thesis subject should be officially registered within 6 months from application to the MSc degree,

Discussion and acceptance of the thesis should not be set before 12 months from registering the M Sc subject;

It could be discussed and accepted before passing the second part of examination)

o Part 2

Program –related speciality courses and ILOs

Students are not allowed to set the exams of these courses before 3 years from applying to the MSc degree.

N.B. Fulfillment of the requirements in each course as described in the template and registered in the log book is a pre-request for candidates to be assessed and undertake part 1 and part 2 examinations.

V- Master Degree Logbook Contents:

A. <u>Basic Sciences courses :</u> 8 Credit points

Includes course specification, basic and professional informations, course contents, student assessment methods, weighing of assessment and list of references of basic science course in part 1 during the first 12 months.

B. <u>Basic clinical courses related to</u> Andrology (16 credit points for lectures and 24 for clinical training)

(Microbiology, general surgery, clinical pathology, psychiatry related to sexology and Internal medicine) in part 1 during the first 12 months. Credit point 16 for didactic teaching and 24 credit points for clinical training.

C. <u>Speciality courses</u> 1- <u>Andrology (134 CP)</u> Requirements

• Credit points: 24 credit point for didactics (lecture, tutorial,

discussion), and 110 credit point for clinical training

• Minimal rate of attendance 80% of training and didactic

1. Clerking of case histories: - 400 cases

2. Minor surgical procedures

- Biopsies : a minimum of 20 cases
- Varicoceletomy : a minimum of 20 cases
- Hydrocelectomy: a minimum of 20 cases

3. Special procedures

- Scrotal Duplex: a minimum of 50 cases
- Penileduplex: a minimum of 20 cases.
- ICI: a minimum of 50.
- 4. Serving scientific activity: a minimum of 30 activities.
- 5. Histopathology: discussion of 50 slides.
- **6. Journal club presentation:** a minimum of 20 presentations.
- 7. Case presentation: a minimum of 50 presentations.

D- Elective courses (2 credit point0

First Part

A- Basic Science Courses

Course 1:Research methodology and Statistics

Number of credit point: 1 CP for didactic, lecture, tutorial teaching and 0 CP for training

• Minimal rate of attendance 80% of didactic

| Course Topics | Credit points | Responsible Dept. | Attendance | % Percentage of total achievement | signature |
|----------------------|------------------|---|------------|---|-----------|
| Research methodology | 0.5 CP | Public health and community medicine | 5hours | 50% | |
| Medical statistics | 0.5 CP | | 5 hours | 50% | |
| | | | | | |
| | | | | | |

Course 2:Ethics in scientific research

• Number of credit point: 1 CP for didactic, lecture, tutorial teaching and 0 CP for training

• Minimal rate of attendance 80% of didactic

| Course Topics | Credit points | Responsible Dept. | Attendance | % Percentage of total achievement | signature |
|---|------------------|--|------------|---|-----------|
| <u>Course 2:Ethics in</u> <u>scientific research</u> | 1 CP | Forensic medicine and toxicology | 10 hours | 100% | |
| | | | | | |
| | | | | | |
| | | | | | |
| | | | | | |

- COURSE 3: MICROBIOLOGY AND IMMUNOLOGY

Number of credit point: 2 CP for didactic, lecture, tutorial teaching and 0 CP for training

• Minimal rate of attendance 80% of didactic

Course Contents and requirements:

| oCurse Topics of <u>pathology</u> | Credit points | Responsible Dept. | Attendance | % Percentage of total achievement | signature |
|---|------------------|-----------------------------------|--------------------------------------|---|-----------|
| Bacterial structure, physiology, and classifications Bacterial genetics, antibacterial agents, mechanism of actions and resistance (0.1cp) 1 hour Staphylococci, Streptococci, and Enterrococci(0.1cp) 1 hour Clostridia and other Gram positive bacilli(Corynebacteri a,Liseria,bacillus group, and Actinomycosis) (0.1cp) 1 hour Nisseria, Porvobacteria(Hae mophyilus,Bordetell a,BrucellaLegionella Yerisinia,Pasteurella) (0.1cp) 1 hour Enterobacteriaceae, Pseudomonas,Vibrios,Campylob acter,Helicobacter Gram negative anaerobic bacteria, Spirochates, Mycobacteria,Clamydia ,Mycoplasma(0.1cp) 1 | 2 CP | Microbiology and immunology | 10hours 1 hour for each topic | 5% for each topic | |
| hour Basic mycology: classification and antifungal agents, Basic virology ,major virus group(0.1cp) 1 hour | | | 10 hours 1 hour for each topic | | |

Andrology Master Degree Program Clinical Rotation Evaluation

Resident Name: (optional)_____Rotation_____

This Form is designed to provide resident feedback to Program Administrators concerning strengths and areas to improve in the variety and organization of clinical exposures provided in the different clinical rotations of the Internal Medicine Program. The forms will be given to the rotation supervisor of each rotation at the end of the rotation. Please feel free to be candid and objective. All comments will not be traceable to the resident completing the form by the immediate supervisor.

Rank the following statements on a scale of 1 to 7 on whether you agree or disagree with them as they pertain to this rotation (1= strongly disagree; 7 = strongly agree)

| Evaluation Scale: | Coud not Judge | Strongly Disagree | £ | | Ê | | ŕ | Strongly Agree |
|--|----------------------|----------------------|---|---|-----|---|---|-------------------|
| Organization of the Rotation | | | | | | | | |
| The overall workload of the rotation was appropriate | | | | | | | | |
| (please make a comment in comments section as to if | | | | | | | | |
| workload was too light or too heavy) | 0 | 1 | • | | | ~ | | - |
