* Aim of the activities book

To provide one source of evidence for the assessment committee that you attained the desired level of competency required to gain the award.

In this book you will document all clinical, academic and other experiences and skills you attained during your training.

<u>Sections of the book</u> <u>For each module / course / rotation</u>

You should fill the following sections:-

A- Clinical case log

- 1- You will first find list with all required cases in the concerned module and the minimum number of cases you must get exposed to and level of participation you should achieve for each type of cases.
- 2- You should record all clinical cases in the module and each case should be signed by you trainer.

Modules Rotation / attendance proof " الأماكن التي تدرب بها

توقيع مدير المستشفى	توقيع رئيس القسم	أسم المستشفي التى
		تدرب بها

توقيع مدير المستشفى	توقيع رئيس القسم	أسم المستشفى التى تدرب بها

2- Clinical case presentation log

Record the cases related to the module that you have presented in a seminar of the activity.

3- Procedures / operations log

- 1- You will find a list for required procedure, diagnostic therapeutic operations and level of desired performance you should achieve at the end of training.
- 2- You will find empty tables to write down the procedure, you level of participation and date and signature of supervisor.

4- Rotation / attendance proof

You should have evidence of achievement the required training hours within each module.

For the whole program fill the following sections.

- 1- Academic activities
 - A- Document all academic activities e.g. lecture, journal clubs, workshops, conference, services attended. This documentation should include the level of participation " attendance, preparation, presentation,....."
- 2- Academic achievements
 - A- Document all outcomes you achieved in the field of:-
 - Audit participation
 - Research "clinical trial" participation.
 - Evidence- based medicine "generation of guidelines" protocols
 -
- 3- Formative assessment log

This document all types of formative assessment attended e.g.:-

- Mini clinical examination
- Ouieses.

The purpose of this curriculum is to describe the training system in Audiological Medicine. The training system ultimately aims to provide

Program aims

2/1-the patient with a doctor trained as an attentive listener, a careful observer, an effective communicator and a knowledgeable and capable clinician. The curriculum describes the competencies required to be registered as a Specialist in Audiological Medicine. The specialist will be able to work as a consultant specialist within the National Health Service in Pediatric and Adult Audiological (or Audiovestibular) Medicine and will have the knowledge, skills and attitudes required to provide a high standard professional service in the specialty.

After completing audiological medicine training, the curriculum will have prepared the doctor to:

- Practice audiological medicine to a high level of competency
- Continue with their continuing professional development
- Engage with appraisal and revalidation
- Review their practice in the light of Good Medical Practice
- Identify their learning needs and goals to develop further specialized

Curriculum Structure:

Duration of program 36 months divided into

Program Structure

Program Time Table

Duration of program 3 years maximally 5 years divided into

o Part 1

Program-related Basic Science courses and ILOs + elective courses

Students are allowed to set the exams of these courses after 12 months from applying to the M Sc degree.

o Thesis

For the M Sc thesis:

MSc thesis subject should be officially registered within 6 months from application to the MSc degree, Discussion and acceptance of the thesis should not be set before 12 months from registering the M Sc subject;

It could be discussed and accepted before passing the second part of examination)

o Part 2

Program –related speciality courses and ILOs

Students are not allowed to set the exams of these courses before 3 years from applying to the MSc degree.

N.B. Fulfillment of the requirements in each course as described in the template and registered in the log book is a pre-request for candidates to be assessed and undertake part 1 and part 2 examinations.

First Part

Academic activities of basic science courses

Practice with the academic and related clinical departments during first year

- Acoustics.
- Anatomy.
- Physiology.
- Medical statistics and Genetics.
- Psychiatric and Neurological diseases
- Principles of phoniatrics.

Course 1: Acoustics.

Requirements

- Credit points: 4 credit point.
- Attend at least 80% of didactic teaching (lectures, tutorial, and seminars).

Name of the course	Credit points	Responsible department	Attendance	Percentage of
the course	pomes	department		Achieved points
Acoustics	4CP	Audiovestibular medicine Unit /ENT	<u>40hours</u>	100%
	<u>2 C.P</u>	Department	20 hours	<u>50%</u>
