

Application of results of the outcomes of the previously mentioned researches -----On Practice

1-Testing protocols of multiresistant bacteria (**MRSA ,VRE,ESBL,Acinetobacter sp.**) **Now** applied routinely to all clinical samples referred to the **Infection Control Lab . at Assiut University Hospitals under Supervision of Prof.Dr. Enas Abdel Mageed Daef.**

2-Testing protocols of candida sp .**Now** applied routinely to all clinical samples referred to the **Infection Control Lab .**

3- **Now**(biological&chemical) monitoring of efficiency of sterilization in central sterilization unit of Assiut University Hospitals from the infection control team is done Monthly from the start Of 2010.

Before 2010:Efficiency of sterilization in central sterilization unit of Assiut University Hospitals was not monitored at all .

-Application of results of the outcomes of the previously mentioned researches -----On Undergraduate teaching

-Addition of teaching of multiresistant bacteria (MRSA ,VRE,ESBL)

-Addition of(biological&chemical) monitoring of efficiency of sterilization after application of this system in central sterilization unit of Assiut University Hospitals from the infection control team.

-Addition of teaching of cold sterilization (Disinfection of endoscopes) after application of this system in Central Endoscopy Unit of Assiut University Hospitals.

-Addition of teaching of (CDAD)clostridium difficile associated diseases as a complication of abuse of antibiotics in hospitalised patients.

On Post-graduate teaching-----

-Addition of teaching of multiresistant bacteria (MRSA ,VRE,ESBL)

- Addition of(biological&chemical) monitoring of efficiency of sterilization after application of this system in central sterilization unit of Assiut University Hospitals from the infection control team.

--Addition of teaching of cold sterilization (Disinfection of endoscopes) after application of this system in Central Endoscopy Unit of Assiut University Hospitals.

--Addition of teaching of (CDAD)clostridium difficile associated diseases as a complication of abuse of antibiotics in hospitalized patients
