

QUALITY ASSURANCE IN EDUCATION

Quality assurance of education refers to the process of verifying that academic and institutional standards are compatible with the mission of an institution education that has been identified, defined, and achieved in a manner that conforms to the corresponding standards both at the national and global level.

ACCREDITATION

Prepared by
Prof. Nahed Shawkat Abul-Magd
Director of Quality Assurance Unit

NATIONAL ACADEMIC REFERENCE STANDARDS (NARS)
COMPETENCY- BASED_2ND EDITION APRIL 2017

Academic standards of the bachelor's program, which were prepared by the National Authority for Quality Assurance and Accreditation with the help of specialized experts and representatives of the various sectors of the beneficiaries, and these standards represent the minimum required to be available in the educational programs of knowledge, skills, and trends.

Accreditation

Recognition is granted by the National Authority for Quality Assurance and Accreditation of Education to the educational institution if it can prove that it has the institutional capacity and achieves educational effectiveness by accordance with the national academic standards that represent the minimum or any other international standards approved by the authority and has advanced systems that ensure continuous improvement and enhancement of quality.

Core Values of Accreditation Standards

- Developing loyalty to the college.
- Promote academic freedom.

- Commitment to scientific honesty
- Teamwork.
- Mutual respect.
- The public interest prevails.
- Achieving justice

12. Community Participation and Environmental Development

What your college offers

- Distinguished study programs that raise your competitiveness at the national and regional Level
- Effective and sophisticated teaching methods through the use of modern technologies and means of presentation, smaller groups, the use of the problem-solving system
- Objective assessment methods through the use of objective questions as well as structured objective clinical examinations

What does the college return from accreditation

- Recognition of the eligibility of the graduate's certificate in the labor market and the corresponding scientific institutions at the national level.
- Financial support from the state to continue the process of improvement and development.
- Achieving the requirements of competition between the corresponding colleges

Student is the basis of the educational process and therefore

- The college is keen to provide equal learning opportunities and provide student support and guidance, encourage student activities, and student participation in decision-making.
- The college is also keen to continue its relationship with students after graduation through the Office of Graduate Affairs

What does the student return if he graduates from an accredited college

- Achieve excellence and competitiveness in the labor market
- Increase access to high-level scientific institutions for postgraduate studies and continuing nursing education

What is your role as a student in obtaining accreditation

- Identify the college's mission, plan and share your opinion on the improvement and development processes.
- Ensure to represent you in making decisions in your college, and in setting development and strategic plans for the college.
- Ask your professor about the course you are studying about the course objectives and what you should learn from studying it (target learning outcomes).
- Ensure to read the course description
- Make sure to fulfill the assignments and decisions assigned to you.
- Actively participate in discussions in the classroom and ask meaningful and constructive questions in your interaction with your professors

- .Interact with your professors to apply modern learning methods (e-learning - self-learning etc.), which aim to equip you with basic skills required by the labor market.
- Participate in the training programs held by the university with the aim to develop your skills and gain more information and knowledge
- Ensure to take advantage of your college's resources (library - computers - laboratory tools etc) and make good use of these resources, they are for you.
- Ensure to evaluate the two processes (teaching and learning) during which you interact with your professors, and to be objective to the maximum degree until the desired goal of this evaluation is achieved, and this evaluation is usually conducted through formal methods such as the questionnaire that is completed at the end of the semester
