- License in delivering mothers.

Language Skills:

Language	Reading	Speaking	Writing
Arabic	Excellent	Excellent	Excellent
English	Excellent	Very good	Excellent
Duetish	Very good	Good	Good

Other skills: Computer skills.

Specific experience in the region:

- Member in cardio- pulmonary resuscitation organization
- Member of The Arab Republic of Higher Of Egypt Ministry Of Education Project
- Supervision and discussion of theses for the MSc. and PHD. Degree in the field of specialization:

Supervision and discussion of Master theses:

1. Effect of nursing guide on peptic ulcer patients improvement at Assiut University Hospital
2. Standards of nursing care for patients undergoing external fixation in trauma unit at Assiut University Hospital

3. Effect of nursing protocol on nurses Knowledge and practice regarding hemodialysis patients
4. Infection control: Effect of a designed teaching protocol on nurse's knowledge and practice regarding to hematemesis patients
5. Developing postoperative care standards for patients who had drainage of chronic subdural hematoma
6. Effect of implementing a designed nursing protocol on nurse's knowledge and practice regarding epileptic patients' outcomes
7. Developing standards of post-operative nursing interventions for lower limb amputated patients
8. Assessment of nutritional status of patients with liver cirrhosis at Minia University Hospital
9. Developing nursing care standards for patients with bronchial Asthma
10. Effect of a designed nursing protocol on nurse's knowledge and practice regarding intravenous therapy at Assiut University Hospital
11. Blood transfusion; impact of implementing a design nursing intervention protocol to minimize patients' complications
12. Kidney surgery: impact of preoperative teaching program on pain management outcome &stasis faction for patients
13. Needs Assessment of patients with obstructive sleep apnea at Assiut University Hospital
14. Effect of developing post operative nursing care standards on cholecystectomy patients at Assiut University Hospital
15. Developing nursing care standards for patients post discectomy at Assiut University Hospital
16. Developing nursing care standards for patient with colostomy at Assiut University Hospital
17. Developing post operative nursing care standards for patient undergoing percutaneous nephrotomy tube
18. Effect of designed nursing guidelines on anxiety level of patients undergoing electro encephalogram
19. Developing nursing care standards among adult patients with uncontrolled essential hypertension
20. Standards of nursing care for patients undergoing external fixation in trauma unit at Assiut University Hospital
21. Effect of nursing protocol on nurses' knowledge and practice regarding hemodialysis patients
22. Developing postoperative care standards for patients who had drainage of chronic subdural hematoma
23. Effect of implementing a designed nursing protocol on nurse's knowledge and practice regarding epileptic patients' outcomes
24. Developing standards of post-operative nursing interventions for lower limb amputated patients
25. Effect of a designed nursing protocol on nurses knowledge and practice regarding intravenous therapy at Assiut University Hospital
26. Blood transfusion: Impact of implementing a design nursing intervention protocol to minimize patient's complications

Supervision and discussion of Doctor theses:

1. Effect of designed training program on nurses' performance regarding care of patient with blood borne viral Hepatitis at Assiut University Hospital
2. Nursing care Standers for Cancer patients undergoing chemotherapy
3. Impact of designed educational program on osteoarthritis patients' outcome at El-Minia university hospital

4. Impact of a designed Nursing Intervention protocol on Quality of life of Patients with liver cirrhosis at El-Minia university Hospital
5. Rehabilitation Guidelines for patients undergoing Arthroscopic Knee surgery for Meniscal trimming
6. Esophagogastroduodenoscopy: Impact of a designed Nursing teaching protocol on Nurse's performance and patient's outcomes
7. Strategies of Daily Living rehabilitative Activities for post Stroke patients at El-Minia university Hospital
8. "Coronary Artery bypass grafting " effect of developing and implementing Nursing care standards on patients outcome
9. Rheumatoid arthritis: The effect of rehabilitation guidelines on improvement the activities of daily living (ADL) of Female patients
10. Impact of nursing educational program on health promotion for patients after intracranial surgery
11. A study of complication of acetate versus bicarbonate solutions during hemodialysis among critical ill patients Assuit university hospital
12. Impact of designed early ambulation protocol on patients outcome post franes femoral coronary procedures at assiut university hospital
13. Study the effect of uncentive spairomentry conservative therapy and blanw bottle among open heart surgery patients on the prevention of post operative pulmonary complications
14. The effect of mothers presence versus music listing on intraoperative awareness and stress response of pediatric patients undergoing open heart surgery
15. Impact of chest physiotherapy and recruitment maneuvers on outcome of mechanically ventilated patients with acute lung injury
16. Effect of three standardized oral hygiene approaches on bacterial colobization in mechanically ventilated patients
17. Impact of health education program for elderly patients undergoing extra corporeal shock waves lithotripsy on clearance of urolithiasis in Minia university hospital
