## **Research plan**

**For maternal and neonatal health nursing department**

**For the time period**

**2022/2017**

### **Vision of the department:**

The Department of Reproductive Health Nursing (Gynecology and Obstetrics Nursing) seeks to excel and lead in the field of women care during the different stages of life.

### **Mission of the department:**

The Department of Reproductive Health Nursing (Gynecology and Obstetrics Nursing) at the Faculty of Nursing, Assiut University, works to prepare scientifically, skillfully and professionally qualified cadres in the field of gynecology and obstetrics nursing through educational programs based on accredited academic standards and scientific research that keeps pace with the requirements of the present and the labor market in order to preserve women's health And improving it during different periods of a woman's life.

### **Strategic objectives of the Department of Maternal and Newborn Health Nursing:**

1. Preparing distinguished students in the field of obstetrics and gynecology nursing who are able to provide the best health care for women during different life periods.
2. Encouraging students to participate in scientific research to prepare a student who is able to compete in the labor market locally and internationally.
