

Awareness campaign report
About "Alzheimer's", "Dangers of Addiction"
Tuesday, 3/8/2022 AD

Within the activities of the community service and environmental development sector of the Faculty of Pharmacy, Assiut University for the academic year 2021/2022 AD, under the patronage and supervision of Mr. Prof. Dr. Mahmoud Al-Badry Abdel Muttalib, the college's deputy for community service and environmental development affairs, and in partnership with the students of the Faculty of Pharmacy, the Ihya family, organizing two awareness campaigns about "Alzheimer's". "Dangers of Addiction" on Tuesday, 3/8/2022, from nine in the morning in the college courtyard.

The students of the Ihya family initially raised awareness about Alzheimer's disease, the medical causes that lead to hallucinations, the types of hallucinations that Alzheimer's patients are exposed to, and eating some foods and medications that help overcome this disease.

They also talked about the dangers of addiction to the individual and society (causes of addiction, the addict's personal flaws, the role of the family in protecting their children from addiction, how to treat addiction).

Today, the students used appropriate means to convey the information and present it in a simplified form using drawings, explanation boards, and brochures. They also added part of the entertainment aspect, and this activity was widely accepted by the college students.

Some of the pictures we took.
