

- 2 -

- 3- Open heart surgery has been possible
a- only in the last fifty years.
b- from prehistoric times.
c- since the nineteenth century.
d- since the invention of valves.
- 4- A patient can still live a comfortable and satisfactory life even after the removal of
a- his brain.
b- his lungs.
c- a major organ such as the stomach or one lung.
d- part of the stomach or the whole liver.

(20 points)

III- Decide whether the following sentences are right or wrong, and correct them:

Pollutants

- 1- Fifty percent of the pie have disappeared.
2- Neither the farmer nor the farm workers is willing to settle the strike.
3- The desk and the chair sits in the corner.
4- He could rather talk to her than to I.
5- We all know whom made this mistake.

(20 points)

IV- Translate into Arabic:

Electric fish

The idea of a fish being able to generate electricity strong enough to light lamp bulbs - or even to run a small electric motor - is almost unbelievable, but several kinds of fish are able to do this.

I- Write a short paragraph on ONE only:

- 1- Pollution
- 2- Wars of tomorrow will be about water.

(20 points)

II- Read the following passage, then answer the questions:

Modern surgery

The need for a surgical operation, especially an emergency operation, almost always comes as a severe shock to the patient and his family. Despite modern advances, most people still have an irrational fear of hospitals and an aesthetics. Patients do not often believe they really need surgery – cutting into a part of the body as opposed to treatment with drugs.

In the early years of this century there was little specialization in surgery. A good surgeon was capable of performing almost every operation that had been devised up to that time. Today the situation is different. Operations are now being carried out that were not even dreamed of fifty years ago.

The heart can be safely opened and its valves repaired. Clogged blood vessels can be cleaned out, and broken ones mended or replaced. A lung, the whole stomach, or even part of the brain can be removed and still permit the patient to live a comfortable and satisfactory life.

- 1- Most people are afraid of being operated on
 - a- in spite of improvements in modern surgery.
 - b- because they think modern drugs are dangerous.
 - c- because they do not believe they need an aesthetics.
 - d- unless it is an emergency operation.
- 2- Surgeons in the early years of this century, compared with modern ones ,
 - a- had less to learn about surgery.
 - b- needed more knowledge.
 - c- could perform every operation known today.
 - d- were more trusted by their patients.
